

Environmental Policy

Recycling plays a crucial role in mitigating environmental impact, Stainless International have a responsibility to contribute to sustainable practises, encourage a mindset among our employees by promoting energy-saving measures. By adopting responsible waste management practises, complying with regulations and fostering a culture of sustainability among employees, our business can contribute to a greener future while enhancing our reputation and corporate social responsibilities.

Issue 1

Date 11.01.24

Stainless International Ltd (Si)

Si is committed to protecting the environment and minimizing our environmental impact in all areas of operation. Our environmental policy is guided by the principles of compliance, prevention, and continuous improvement in line with the requirements of the ISO 14001 Environmental Management System (EMS).

We pledge to:

1. **Comply with legal and regulatory requirements:** Adhere to all applicable environmental laws, regulations, and other compliance obligations relevant to our operations.
2. **Prevent pollution and minimize waste:** Implement proactive measures to reduce pollution, conserve resources, and responsibly manage waste through recycling and efficient use of materials.
3. **Reduce environmental impact:** Identify and assess the environmental aspects of our activities, products, and services to reduce emissions, energy consumption, and water usage.
4. **Promote environmental awareness:** Educate and empower employees, contractors, and stakeholders to support environmental initiatives and make sustainable choices.
5. **Set and achieve measurable objectives:** Establish environmental goals, regularly review performance, and pursue opportunities for improvement through technological innovation and best practices.
6. **Enhance transparency:** Communicate openly with stakeholders about our environmental efforts and progress.
7. **Climate Change:** Take into consideration operational processes and the effects these have on the environment.

This policy is communicated to all employees and made available to the public. It serves as the foundation for achieving our environmental objectives and upholding our commitment to sustainability.
