

UK REACH Statement (The REACH etc. (Amendment etc.) (EU Exit) Regulations 2019)

Stainless International Ltd supplies stainless steel products in the form of coils, sheets, plates, and long products. These products are considered articles under UK REACH, as their shape, surface, and design are more relevant to their function than their chemical composition.

The stainless steel products are manufactured through rolling or drawing processes. The constituent elements are bound within a solid metallic matrix and are not intended to be released under normal or reasonably foreseeable conditions of use.

In accordance with UK REACH requirements, these articles do not involve the intentional release of substances and therefore are not subject to registration requirements for substances within articles.

Stainless International Ltd monitors the UK REACH Candidate List of Substances of Very High Concern (SVHC) and will communicate information in line with Article 33 obligations where applicable.

Andrew Holland, Managing Director
Stainless International Ltd.
